

Akkerman 1614 (2015) Pumpkin Info

Grown from: 1791 Holland x Self

Seeds Started: 06th October
Transplanted: 16th October
First true leaf 26th October
 20th November
Pollinated: 23rd December,
Plant Size: 150sq feet at pollination, fruit
 11 feet out, 2nd fruit on main.

Patch Info:

My favourites were TM Best, lithovit and liquid calcium. I would highly recommend all of these products. I will probably use all of them again this.

Water was supplied via two 40 gallon steel drums gravity fed from the top of a hill.

Pumpkin weighed in 6% heavy 1614lb's (732.5kg's)

Dap	Date	OTT	Est. lbs	lbs/ day avg
0	23/12/2014			
20	12/1/2015	178	125
